

# Energility, LLC

**FOR IMMEDIATE RELEASE**

## **Energility, LLC brings energy assessments to small businesses of Ohio**

Columbus, Ohio, October 1, 2015

Energility, LLC is a newly formed company of two local energy advisors with many years' experience in providing energy solutions. Mr. Craig Foster, Professional Engineer (PE), is the Director of Delivered Services, with over 35 years' experience. Mr. Justin Kale, Certified Energy Manager (CEM), is the Director of Opportunity Development for Energility, LLC with over 15 years' experience. Together, their company is working to help small businesses reduce the cost of doing business, increase the efficiency of existing resources, and reduce the business operational impact on our environment.

Energility, LLC will enable small businesses and nonprofits to change the operational concept of "energy spending" to "energy as a manageable asset". This concept can eliminate decisions based solely on equipment first cost and lead to making decisions based on investments in energy efficiency that deliver increased benefits to their businesses and improvements in sustainability. Energility's energy assessments are best in class and affordable to the small business community. Energility, LLC provides energy management services which deliver the solutions their clients need, add value by achieving the client's goals, and cultivate the client's knowledge along the journey.

Every opportunity starts with the same goal: maintain a relationship long-term to be a small business' trusted energy advisor. By seeing energy efficiency clearly, clients can eliminate wasted energy and improve their business. To convert your energy spending to a manageable asset, contact Energility at [www.energility.com](http://www.energility.com) or 614-754-8468.
